DENTAL SOCIETY

Alaska Dental Society 2026 Annual Meeting

May 22-23, 2026 | Seward, Alaska

www.akdental.org

PRESENTERS

Richard J. Rosato, D.M.D. and President of the ADA

President Dr. Richard J. Rosato is President of the American Dental Association. Dr. Rosato, an oral and maxillofacial surgeon practicing in Concord, Hanover and Peterborough, New Hampshire, previously served as First District Trustee of the ADA.

Dr. Rosato is a long-standing member who has served the Association in many leadership roles, including chair of the ADA Council on Ethics, Bylaws and Judicial Affairs, and as chair of the ADA Election Commission.

Dr. Rosato previously served as president of the New Hampshire Dental Society and the New Hampshire Oral and Maxillofacial Surgery Society. He is a Fellow of the American College of Dentists, the International College of Dentists and the Pierre Fauchard Academy. He has also served on the Boards of the ADA Business Enterprises, Inc., ADA Business Innovation Group and the ADA Innovation Advisory Committee.

Dr. Rosato earned his dental degree with honors from Tufts University School of Dental Medicine and served as chief resident of the University of Illinois-Chicago Oral and Maxillofacial Surgery residency program. He and his wife, Laurie (also a practicing dentist), are the parents of three adult children.

Dr. Andrew Currie

Dr. Andrew Currie loves travel and dentistry, so he's excited to make the 3500 mile journey from Atlanta, GA to spend some time with the Alaska Dental

Society. Dr. Currie earned his DMD and Masters of Oral Biology from the University of Louisville School of Dentistry prior to completing a two-year, implant-and-surgery-focused GPR at the Medical College of Georgia (now the Dental College of Georgia at Augusta University). For 15 years, he has dedicated his private practice almost exclusively to surgical and implant dentistry, and he handles most of the complex implant cases for his 5 office locations. Teaching has long been a passion of Dr. Currie's, and he

lectures nationally (and occasionally internationally) on digital dentistry, guided surgery, 3D printing, and all things related to dental implants for various companies and institutions such as Biohorizons, Acteon, Implant Pathways, 3D Systems, and the AAID Maxicourse.

Dr. Alex Fleury

Dr. Alex Fleury received his Masters of Science Degree in Oral Biology and Certificate in Endodontics from the University of Pennsylvania School of Dental Medicine. He received his DDS Degree in 1984 from the University of São Paulo. Dr. Fleury served as Director of Predoctoral Endodontics for 6 years at both

Nova Southeastern University School of Dental Medicine in Florida and Texas A&M College of Dentistry. He currently serves as Assistant Professor at Texas A&M College of Dentistry, working with Endodontic Residents.

Of particular pride is being named the recipient of the "Edward E. Osetek Award" for best new Endodontic Educator of the year by the American Association of Endodontists. In addition, Dr. Fleury is honored to have been the recipient of the "Richard F. Weiss Achievement Award presented by the Louis I. Grossman Study Club (University of Pennsylvania). He also served on the Scientific Advisory Board of the Journal of Endodontics. Dr. Fleury is currently in the full-time private practice of Endodontics in Dallas, Texas.

PRESENTERS

Dr. Brooke Fukuoka

Dr. Brooke is a passionate speaker whose primary focus is improving oral health for patients who have special healthcare needs and

geriatric patients who live in long-term care. She has practiced in a diverse array of settings and has built programs to help expand access to care for her patients. In her part time practice, Your Special Smiles PLLC, she practices portable dentistry, hospital dentistry, teledentistry and most importantly has developed a professionally aided home hygiene program in two long-term care facilities. She also works full time with a Federally Qualified Health Center, Family Health Services of Idaho where she has developed their Advanced Delivery Dental Clinic for patients who have special healthcare needs. She is active in organized dentistry and enjoys working with diverse groups of people. Her high-energy and fast-paced courses can be catered to any group regardless of size or education level. She strives to create a fun, yet educational, interactive environment where learners gain knowledge and experiences they can immediately implement into practice.

David Gibb

Mr. Gibb is the President of Global Physicians Alliance and has extensive experience in the healthcare and business industry

spanning the past 25 years. This experience includes starting and managing his own businesses both in the private sector as well as the public arena. Mr. Gibb has authored and created several small business educational programs, which have been successfully marketed throughout North America. He has had articles published in newsletters and magazines addressing specific areas of concerns to small businesses. He and his wife Amy have been married for 23 years, and are the parents of 5 children.

Mr. Gibb has spoken to thousands of people nationally and internationally, including healthcare professionals, helping them understand how to maximize the benefits of small business ownership.

Susan Cotten, BSDH, RDH

Susan Cotten, BSDH, RDH, has performed more than 60,000 oral cancer screenings and is a nationally recognized speaker and leader in screening and the early detection of oral cancer. She

is the founder of Oral Cancer Free and Oral Cancer Consulting, and developer of The Cotten Method™ of Screening, a proven, science-based approach to comprehensive oral and oropharyngeal cancer screening. Susan works with dental professionals to build confidence in screening protocols, reduce liability risk, and improve early detection.

Susan's career includes working clinically in private practice and public health as an Integrative Dental Hygienist in medical-dental integration and serving as Dental Lead for the Alliance for HPV-Free Colorado. She has volunteered with the Denver Homeless Head and Neck Cancer Screening and Care Group and Colorado Mission of Mercy, where she served as a board member and oral cancer screening coordinator. She has organized and led numerous free oral cancer screening events, including the Denver Broncos Health and Wellness Expo and the Rocky Mountain Dental Conference.

Susan serves on the RDH Advisory Boards for RDH Magazine and the Oral Cancer Foundation, is an instructor for the National Network of Healthcare Hygienists, and is a 1994 graduate of the University of Colorado School of Dental Medicine, Department of Dental Hygiene. On a personal note, she loves watching college football, walking the beaches of Hawaii, and is a former country dance competitor.

Alaska Dental Society 2026 Annual Meeting

May 22-23, 2026 | Seward, Alaska

www.akdental.org

PRESENTERS

Christine R. Melch, DDS

Christine Melch, DDS, MS is a longtime Alaskan who moved back home this past summer. She is a Major in the United States Air Force and

currently serves as the periodontist at Joint Base Elmendorf-Richardson in Anchorage, Alaska. She completed her specialty training through the Air Force Postgraduate Dental School and earned a Master of Science degree from the Uniformed Services University for research focused on auricular acupuncture for post-surgical pain control. Her manuscript is currently under review for publication.

Dr. Melch also completed a one-year AEGD at Offutt Air Force Base and graduated as President of her dental class in 2016 from the University of Washington School of Dentistry. She has lectured at national meetings for the American Academy of Periodontology as well as regional periodontal meetings including the Southwest Society of Periodontists. Her previous assignments include Nebraska, Hawaii, North Carolina, and Texas

Anthony Penketh

Anthony Penketh is the Vice President of Business Development at ePractice Manager, a nationally recognized dental consulting firm with

more than 25 years of experience helping dentists and oral surgeons build stronger, more profitable, and better-managed practices. He brings a unique blend of corporate leadership and hands-on dental consulting experience, having trained more than 2,500 dentists and their teams on core business fundamentals such as new patient generation and case acceptance.

Earlier in his career, Anthony served for nearly a decade as Head of Sales and Chief Marketing Officer at ClearCorrect, where he helped grow the company from a startup with a few hundred doctors to more than 10,000 providers before its acquisition by the Straumann Group. Today, he focuses on helping practices implement proven personnel, training, and management systems that support exceptional patient care while building sustainable, successful businesses.

Royann Royer, CDA, RDH, MPH

Royann Royer, CDA, RDH, MPH is an experienced dental educator and public health professional with over two decades of teaching in the

University of Alaska Anchorage Dental Programs. Her expertise includes Local Anesthesia, Nitrous Oxide Sedation, and Radiology, with a strong focus on curriculum development and simulation-based education. She led an accredited dental assisting program, co-authored educational textbooks, and co-developed radiology and local anesthesia simulation programs. She is currently Director of Healthy Smiles Forever, a non-profit organization providing dental services to long-term care residents. Ms. Royer's work also extends internationally through dental clinics and educational outreach in Russia, Mexico, and Nepal.

COURSES

Up Your Implant Game: Anterior Implant Esthetics, Complex Treatment Planning, and Current Methods, Materials, and Workflows

Presented by Dr. Andrew Currie

Ever wish you'd done some type of residency? Ever feel like there is so much to know to be a master of your craft that it is impossible to attend all the CE on your wish list?

If you do, then you don't want to miss this year's ADS meeting in Seward, Alaska. Dr. Andrew Currie is going to take you on a crash course of all things dental implants - from small, priceless pearls to large, critical concepts - you will leave having drunk from a firehose. Dr. Currie spent two years in an implant focused residency, and then he's stacked 14 years of CE and implant experience on top of that. His goal: to have all attendees leave having leveled up and feeling like they completed a mini-implant residency, ready to plan (and successfully execute!) a wide array of implant treatment plans from single units to full mouth rehab.

Restoring implants can be one of the easiest or one of the most challenging things dentists deal with in their daily practice. A perfectly placed implant is a joy to work with, and a less-than-perfect one can become a tough situation for dentist and patient alike. Knowing how to plan properly - whether you're referring to an outside surgeon or not - is critical for a predictable, ideal result. Knowing how to salvage a tough situation and turn it into a beautiful final restoration is an invaluable skill set, and there are many, many tricks and methods to make it happen. Come join us on May 22-23 to learn new, cutting-edge approaches, rub elbows with colleagues and friends, and to party on a 3-hour tour with Dr. Currie, Gilligan, the Skipper, and more!

The Wonderful World of Special Care: Special care concepts that can help any patient be more comfortable in your chair

Presented by Dr. Brooke

The Wonderful World of Special Care is an interactive course that puts the learner in the shoes of many of our patients. This course contains simulations that leave the learners with a newly formed empathy for our patients' struggles in the dental office. Step out of your world and into ours as you engage and feel what it is like to experience the world in a different way. Sit in the "Splash Zone" for a particularly interactive experience. **IN PERSON COURSE ONLY. NO RECORDING ALLOWED.**

Clinical review of Stage IV, Grade C Periodontitis

Presented by Major Christine R. Melch, DDS

This course provides a comprehensive clinical review of Stage IV, Grade C periodontitis with an emphasis on evidence based diagnosis, risk assessment, and prognosis. Attendees will explore advanced non-surgical and surgical treatment strategies aimed at stabilizing disease, preserving natural dentition, and extending tooth longevity. The program will critically evaluate when regenerative, resective, or supportive therapies may be appropriate alternatives to full-arch extraction and All-on-X implant solutions, supporting thoughtful, patient centered decision-making in complex periodontal cases.

COURSES

Reactive vs. Proactive Hiring: Building a Stronger, More Resilient Dental Team

Presented by Anthony Penketh - ePractice Manager

Today's hiring landscape has changed, and many practices are feeling the pressure. Fewer applicants, higher expectations, and increased competition have turned staffing into one of the biggest challenges facing dental practices today. If hiring feels reactive, stressful, or never-ending, you're not alone.

This dynamic and highly practical CE seminar will show you how to break the cycle of reactive hiring and build a proactive system that consistently attracts, develops, and retains top talent. Through real-world examples and a relatable case scenario, you'll learn how to create a steady pipeline of candidates, streamline your hiring process, and implement onboarding and retention strategies that actually work.

Walk away with clear, actionable steps you can implement immediately to reduce staffing stress, strengthen your team, and improve overall practice performance.

Build a resilient, high-performing organization by establishing an "always-on" recruitment system and structured, data-driven hiring processes that avoid reactive mistakes, speed up talent acquisition, and secure top candidates. By implementing structured onboarding, you can accelerate new hire productivity and improve team confidence. Furthermore, maximizing retention involves creating a supportive work environment that aligns with employee needs, while operational stability is achieved through clear, proactive management systems that reduce daily chaos.

Increasing Case Acceptance: Turning Conversations into Confident "Yes" Decisions

Presented by Anthony Penketh - ePractice Manager

Case acceptance isn't about selling—it's about guiding patients to make confident decisions about their health. Yet across the industry, acceptance rates remain below 50%, leaving significant treatment—and better patient outcomes—on the table.

In this highly engaging and practical CE seminar, you'll learn how to transform the way you communicate with patients at every stage of the visit. From the first impression to the final close, this course provides a proven framework to build trust, clearly communicate value, overcome objections, and confidently guide patients to say "yes" to treatment.

Through real-world examples, relatable scenarios, and immediately applicable strategies, you'll discover how small shifts in language, structure, and mindset can dramatically improve both patient experience and practice performance.

Establish immediate trust and credibility by cultivating genuine rapport and utilizing active listening to understand patient motivations. Master consultations through clear, empathetic communication, translating clinical needs into high-value solutions that overcome emotional barriers and address financial considerations without pressure. Finally, ensure team-wide consistency to guide patients confidently toward decisions.

Review of Updated Radiology Guidelines / Recommendations for Dental Clinicians

This presentation will provide an overview of current recommendations, highlighting the importance of ongoing education and adherence to best practices in dental radiology. Key points will include how to incorporate these new guidelines into practice, the importance of reviewing state laws, and best practices for radiation safety. We will review the ALARA principle, techniques to improve radiation safety and how to reduce the overall risks of dental radiographic imaging.

The primary objectives are to promote consistent, safe, and compliant ionizing radiation practices, ensuring operators adhere to current guidelines to minimize unnecessary exposure while maintaining effective patient care. These goals are maintained through regular monitoring and evaluation to guarantee ongoing safety and accuracy.

COURSES

I Screen, You Screen, We All Screen: No one has ever done that before!

Presented by Susan Cotten, RDH

Join oral cancer coach Susan Cotten, RDH, for this engaging and intensive program designed to elevate and calibrate dentists and dental hygienists in an updated, comprehensive oral cancer screening. This course will review the etiologies of oral and oropharyngeal cancer, unpack the additional risk factors for oral cancer – risk is more than tobacco and alcohol, dive deep into the components of a comprehensive visual and tactile, extraoral, and intraoral evaluation/oral cancer screening, and discuss the often overlooked signs and symptoms associated with oral and oropharyngeal cancer. Both dental hygienists and dentists play a critical role in early detection, and team calibration is critical. This course is a call to action to elevate the standard of care in screening, reduce the risk of liability for the dental professional, and increase early detection. Attendees will gain a solid knowledge of an updated oral and oropharyngeal cancer screening, and leave with actionable steps they can implement into their practice on Monday morning.

Objectives:

1. Name additional risk factors for oral cancer, beyond tobacco and alcohol.
2. Summarize areas of liability for the dental professional in oral cancer.
3. Describe the components of a comprehensive visual and tactile, extraoral evaluation. To include location and proper palpation of the thyroid and cervical lymph nodes.
4. Describe the components of a comprehensive visual and tactile, intraoral evaluation. To include evaluation of the oropharynx.
5. Explain the signs and symptoms associated with oral and oropharyngeal cancer.

Anatomically Centered Endodontics. A Logical and Simple Pathway to Long Term Success

Presented by Dr. Alex Fleury

Endodontic treatment has evolved significantly from simple beginnings, and the success rate of this treatment has increased dramatically in the past decade or so, allowing clinicians to save teeth in a predictable and safe manner. Anatomically oriented and conservative preparation of the root canal system is the best approach for long term success in endodontics. The Anatomically Centered Approach which will be proposed in this course allows us to sacrifice less dentin, to enhance the irrigation process significantly, and to seal the root canal system with the best science has to offer today. Anatomically Centered Endodontics is not about a new instrument, equipment or products, but the combination of scientifically proven techniques and materials in one simple, biologically driven, and inexpensive workflow. The main purpose of this course is to help clinicians obtain long-term success in their endodontic cases without the need of complex, or expensive equipment, while providing the best possible care to their patients.

Keep What You Earn: Lawsuit Defense & Tax Secrets Every Dentist Should Know

Presented by Dave Gibb, Legally Mine

This symposium will walk you through the essential structures and entities required to safeguard both your business and personal assets. By implementing powerful asset protection strategies, you can eliminate the motivations behind lawsuits, effectively preventing them from gaining traction. Legally Mine recognizes the crucial role estate planning plays in securing your wealth and preserving your legacy for future generations. With expert guidance, you'll learn how to fortify your assets and ensure your legacy is not only protected but continues to thrive. By the end of this session, you'll have a clear understanding of how to safeguard your financial future and leave a legacy.

BUSINESS PANEL

FULL SAIL TO SUCCESS

Navigating the Waters of Dental Practice Mastery

Chart a confident course for your future at this must-see, all-hands-on-deck panel designed to guide dentists from first launch to a successful handoff. Full Sail to Success brings together an unmatched fleet of experts—on one stage, at one time—each essential to navigating the complex waters of dental practice ownership and personal prosperity.

This powerful panel features a financial wealth advisor, CPA firm, dental practice insurance broker, Bank of America dental practice solutions advisors, and a dental practice transition broker—a complete navigational crew focused on helping you avoid hidden reefs, seize favorable winds, and steer toward long-term success. From acquisition and growth to risk management, tax strategy, financing, wealth accumulation, and eventual transition, no critical waypoint is left uncharted.

Unlike traditional lectures, this dynamic session is structured as a guided voyage. The five panelists will both ask and answer the hard questions dentists face at every stage of their careers—creating a real-world, start-to-finish roadmap for success. You'll gain practical "how-to" insights, strategic foresight, and clarity that can only come from seeing the entire journey at once.

Whether you're just setting sail, navigating open waters, or planning your next port of call, this session delivers the tools to help you captain your practice with confidence. Miss this panel, and you risk drifting without a compass. Attend, and you'll leave with a clear heading toward professional achievement and personal fulfillment.

BUSINESS PANEL

Paul Houston | Conrad Houston Insurance

Paul was born in Fairbanks Alaska and is proud to be a lifelong Alaska. Paul graduated from Dimond High School in Anchorage, Alaska. He subsequently attended the University of Northern Colorado and graduated with a business management degree. He began working in the family insurance brokerage after graduation and after some time, left to attend Willamette University School of Law. Upon graduation, he returned to Alaska to practice law and at the same time remained involved in management of the insurance agency. Eventually he turned his full focus to the insurance agency and has been running Conrad Houston Insurance for over 35 years.

Mike Dennis | Conrad Houston Insurance

Mike came to Alaska with his family when he was in 6th grade. Mike graduated from Dimond High School and the University of Northern Colorado. His early plans were to college football, but after he met his wife Keisha and began a family he made the career change to commercial insurance. Mike works with a broad variety of clients ranging from hospitality to tourism to construction. He has been with Conrad Houston Insurance for over 35 years.

Rachael Mohns | BDO

Rachael Mohns is a Tax Senior Manager in BDO's Anchorage office. She is a lifelong Alaskan and joined BDO in 2016 after graduating from the University of Alaska Anchorage. Rachael advises privately owned businesses and their owners on tax compliance and planning, including entity selection and business structuring, transactional support for mergers and acquisitions, and ongoing consulting related

to retirement planning and employer services. She has experience with partnerships, S and C corporations, and exempt BIO, across federal and multi-state filings, and supports clients with accounting method changes and other specialized transactions.

Rachael is active in the Anchorage community and has participated in speaking engagements with future accounting graduates at her alma mater (UAA). She is an active trustee for the Make-A-Wish Alaska & Washington Chapter and is currently the Finance Chair.

Matthew Muller | Bank of America

Matt is a Regional Vice President specializing in financing of practice start-ups, commercial real estate, debt consolidation and equipment financing. Matt began his career with Bank of America at the beginning of 2019 following a successful tenure focusing on dental core equipment for new and expanding offices. Matt covers the Pacific Northwest (AK, WA, OR, MT, ID) and is committed to providing his clients the service and resources necessary to get their projects done on time and within budget.

Michael Thompson | Bank of America

Michael began his career with Bank of America in 2016 within the Practice Solutions division. In early 2019, he was promoted to serve as the Regional Manager for the Pacific Northwest (AK, WA, OR, MT, ID) specializing in medical financing. In this role, he supports clients in practice acquisitions, start-ups, real estate, debt consolidation and expansions. He surrounds his clients with the right team of advisors to help them realize their dreams of successful practice ownership. Michael has been responsible for over \$400 million in funding volume to the practice community in his career with Bank of America.

Paul Consani | Consani Associates

Paul Consani, President/Broker, has been personally brokering dental practices in Alaska since 1996. He is a Member of American Dental Sales and PVSG - Practice Valuation Study Group. Paul is a helpful open book on how to prepare your practice for sale and how to prepare to purchase a practice. Consani Associates Ltd. is a proud member company of ADS Dental Transitions, a study club and advertising affiliate of 23 independent large regional brokers. ADS is an invitation-only national organization of brokers consisting of dentists, attorneys and accountants who specialize in dental practice transitions.

All ADS member companies are independently owned and operated. As a member broker, we have access to additional nationwide advertising campaigns that add to our own extensive advertising outreach. Learn how our partnership can help you.

Ryan Callaway | North Harbor Wealth Management

Ryan R. Callaway, CFP®, is Chief Executive Officer and Private Wealth Advisor at North Harbor Wealth Management, an Ameriprise advisory practice in Anchorage, Alaska. Ryan grew up in Alaska, attended Robert Service High School and then attended University of Northern Colorado, where he graduated with a BS in Business Administration. With over 20 years of experience, Ryan specializes in retirement and tax planning, investment management, estate strategies, and wealth preservation. He has been recognized by Forbes as one of Alaska's Best-in-State Wealth Advisors and leads a team committed to personalized financial guidance that helps clients pursue their goals with confidence. He and his wife Lyndsey have four daughters and the entire family loves Alaska whether it be in the Prince William Sound or the shores of Big Lake.
